

Thomas,

I am appreciative to you for the invitation that I received to attend the Way of the Master class. It certainly changed my outlook personally regarding the role that this style of ministry plays in reaching lost souls for Christ. I have to admit that prior to attending the Way of the Master class I had pre-conceived notions pertaining to anyone that would partake in handing out Christian tracts, or participate in what I in the past have categorized as mega-phone ministry. I have always held the belief that our Lord and Savior can and will reach the lost through all means that He deems necessary. After attending the Way of the Master class I realized that this ministry is definitely one of those ways. I believe that this class has caused me to get outside of the box in terms of how I now approach people that I come across daily. I am thankful for the boldness that I was challenged in through this class. I would recommend this class to anyone who wants to reach a new level of urgency and boldness in their faith walk. This class reminded me of my purpose here on earth, and that simply is; Serving the Lord in all that I do taking as many people with me before my earthly body expires. Thank you for this opportunity.

Derik Basl
